M I D T O T A L

The Mid Total advises the counselor concerning the influence UNDECIDED responses may have on the validity of the test results. Although there is no clear-cut, definitive marker or cut off point which delineates boundaries for degrees of validity, a combination of statistics and practice suggests the following:

TOTAL MIDS

0-30	Excellent to Acceptable Validity
31-50	Progressive impact on validity.
51-180	Impaired validity to no validity - Attitude and Consistency Scales considered invalid.

ROBERT's Mid Total is 10.

A T T I T U D E S C A L E

This scale serves to alert the counselor to the possibility that the respondent is painting a picture of psychological functioning that may be either too optimistic or too pessimistic. A high score SUGGESTS a positive self-perception or defensive overstatement. A low score SUGGESTS self-disparagement or purposeful exaggeration of undesirable characteristics. The low scorer is often the victim of a negative self-image and/or wishes to emphasize the depth of self-concern.

ROBERT's score in the NEUTRAL range suggests that he answered the questions in an unbiased or balanced manner, showing little tendency to answer in either a self-critical or a self-favoring direction.

C O N S I S T E N C Y S C A L E

This scale alerts the counselor to how well the testee's responses to similar pairs of questions agree. The score is related to reliability, but a high score does not guarantee validity.

ROBERT's score in the NEUTRAL range indicates that there was reasonable consistency in answering similar questions.

* * *

O V E R A L L A D J U S T M E N T

This scale is designed to portray overall personal and social adjustment. It represents a statistical sampling of questions selected from each of the nine T-JTA traits, combining the various facets of personality represented in the test, and serves as a broad gauge of personal functioning and adjustment. In a sense, it is a measure of how effectively the subject interacts and copes with life circumstances.

A high score suggests emotional strength, a sense of security and self confidence. The high scorer is likely to be a self-actualized individual who is not only confident, but adaptable and of generally agreeable disposition. There is usually a freedom from tension and anxiety and sufficient confidence to cope with the vicissitudes of life.

ROBERT's Overall Adjustment sten score is 6. This is considered AVERAGE.

* * *

 TRAIT PATTERNS

Certain trait score combinations or patterns have special meaning beyond the individual trait scores themselves. Patterns are not really diagnostic entities or syndromes; rather, they help to clarify the multiple personality forces which contribute to the total behavior of the individual. Trait Patterns are reported to call attention to the T-JTA PROFILE where the experienced test user gets a sense for the existence and significance of various patterns.

For the sake of convenience only, patterns are noted if the applicable percentiles reach a high of the 76th %ile or a low of the 19th %ile. Please remember that Trait Patterns do not represent measurement per se. They are based on a sense or feeling for certain response characteristics gained from experience with the test.

* * *

 PLEASE TAKE NOTE OF THIS COMMENT:

 =====
 = 'SHADED ZONE INDICATIONS' deal with empirical or =
 = 'clinical' desirability as indicated by the profile =
 = shading. Thus a respondent who has an 'average' =
 = sten (5 or 6) might be listed 'improvement desirable' =
 = in zone indication. 'Average' is typical, not =
 = necessarily exemplary. =
 =====

I N T E R P R E T A T I O N O F T R A I T S C O R E S

=====

FOR THE CONVENIENCE OF THE COUNSELOR, TRAIT CATEGORIES
HAVE BEEN BROKEN INTO RESPONSE CONFIGURATIONS AND
QUESTION GROUPINGS CALLED 'RESPONSE THEMES'. EACH
RESPONSE THEME IS INDICATED BY AN ARROW ->.

T R A I T A, N E R V O U S / C O M P O S E D

This trait measures nervousness whether induced by internal stimuli or by external circumstances. Manifestations may be excitability and distractibility, and/or excessive stress in response to circumstantial pressures.

ROBERT scores at the 54th percentile. His sten score is 6.

This is in the IMPROVEMENT DESIRABLE zone of the profile.

Please refer to the RESPONSE THEMES below for explicit patterns or tendencies.

NERVOUS/COMPOSED RESPONSE THEMES

=====

-> EXCITABLE, EASILY DISTRACTED

15. Is...easily bothered by noise and confusion? YES NO
35. Do noisy, active children get on...'s nerves? YES

-> CALM, RELAXED

3. Is...relatively calm when others are upset or emotionally
disturbed? YES
7. Does...have difficulty concentrating while reading or studying? NO
17. Does...usually appear composed and serene? YES
27. Is...more excitable than most people? NO
32. Does...quickly recover composure after an accident or other
disturbing incident? YES
72. Is...regarded as a 'high-strung' person? NO
75. Does...often have 'the jitters' for no particular reason? NO

-> TENSE, RESTLESS

65. Does...find it difficult to relax because of a restless need to
be constantly busy? YES
68. Does...seek release from tension by excessive smoking, eating,
or drinking? YES
80. Does...get tense and anxious when there is much work to be done
in a short time? YES

-> TRANQUIL

25. Does...feel uneasy when riding or driving in traffic? NO
38. Does...often allow tension to build up to the point of feeling
'ready to explode'? NO
40. Does...frequently use medication to aid in relaxation? NO

44. Is...relatively free from worry and anxiety? YES
 47. Does...worry a great deal about health? NO
 56. Does...have any nervous mannerisms such as nail-biting,
 foot-tapping, etc.? NO
 62. Does...suffer from indigestion or loss of appetite when worried
 or under tension? NO
 70. Does...sleep well, and find it easy to relax when sitting or
 lying down? YES

T R A I T B, D E P R E S S I V E / L I G H T H E A R T E D

This trait measures depressive tendencies and reactions characterized by feelings of discouragement and dejection.

In everyday language we speak of 'feeling depressed' meaning a TEMPORARY downturn in mood: gloomy, dejected, sad. Some individuals suffer from a SEVERE AND PROLONGED depression in which they feel PROFOUNDLY sad, joyless, empty and lonely. Help may be needed in defining antecedent events or circumstances in order to ease the pain of a disturbing incident and to assist in rebuilding self-esteem and a sense of well-being.

ROBERT scores at the 34th percentile. His sten score is 4. This is in the ACCEPTABLE zone of the profile.

DEPRESSIVE RESPONSE THEMES
 =====

-> FEELINGS OF REJECTION & INADEQUACY

127. Is...bothered at times by feeling unappreciated or by the idea that 'nobody cares'? YES

-> FEELINGS OF DISCOURAGEMENT, DEJECTION, PESSIMISM

101. Is...hopeful and optimistic about the future? MID

-> THE FOLLOWING QUESTIONS WERE ANSWERED IN THE NONDEPRESSIVE OR LIGHT-HEARTED DIRECTION:

97. Does...feel disillusioned about life? NO
 118. Does...feel that life is very much worth living? YES
 135. Is...often so low in spirit as to be close to tears? NO
 139. When deeply disturbed about something has...ever contemplated suicide? NO
 155. Does...at times suffer extreme physical exhaustion resulting from emotional conflicts? NO
 180. Does...have periods of depression without apparent reason which last for several days or more? NO
 171. Does...have periods of idleness when it is difficult to find any reason for either physical or mental effort? NO
 104. Does...have phobias or a deeply disturbing fear of any object, place, or situation? NO
 94. Does...often feel left out or unwanted? NO
 142. Is...often troubled by a lack of self-confidence? NO
 146. Is...easily disheartened by criticism? NO
 169. Does...often feel discouraged because of a sense of inferiority? NO

130. Does...often dwell on past misfortunes? NO
 176. Does...often feel depressed by memories of childhood or other past experiences? NO
 116. Are there times when...feels discouraged or despondent over lack of progress or accomplishment? NO
 137. Is...frequently depressed because of personal problems? NO
 152. Does...often have 'the blues' or feel downhearted for no apparent reason? NO
 159. Does...smile or laugh a good deal? YES

T R A I T C, A C T I V E - S O C I A L / Q U I E T

This trait consists of two aspects. One aspect is characterized by ACTION - energy and activity. ROBERT's score on this part is EXTREMELY HIGH. The other aspect is characterized by SOCIALITY - an interest in social interaction. His score on this part is EXTREMELY HIGH.

ROBERT's Trait Score is at the 90th percentile. The sten score is 10. This is in the EXCELLENT zone of the profile. A score in this range suggests a preference and, perhaps, need for activity and social participation. Please refer to the RESPONSE THEMES for possible variations.

ACTIVE-SOCIAL/QUIET RESPONSE THEMES
 =====

-> ACTIVE LIFE STYLE

6. Does...prefer a restful, inactive vacation to an energetic one? NO
 16. Does...avoid physical exertion and strenuous activity? NO
 19. Does...like to keep on the move in order not to waste time? YES
 26. Does...exercise regularly in order to keep in condition? YES
 33. Does...move briskly and with energy? YES
 37. Is...the kind of person one might call a 'self-starter' or a 'go-getter'? YES
 42. Does...have a wide range of interests? YES
 45. Does...like to have plenty to do? YES
 55. Is...considered an industrious and tireless worker? YES
 82. Does...enjoy activity and excitement? YES
 89. Would people refer to...as a person who is 'always on the go'? YES

-> ENJOYMENT OF PEOPLE AND A NEED FOR GROUP INVOLVEMENT

9. Does...lead a quiet life, without becoming involved in many relationships outside of home and work? NO
 24. Does...prefer to be alone rather than with people? NO
 28. Does...like to entertain guests at home? YES
 64. Does...limit himself or herself to one or two friends? NO
 76. Does...prefer to read or watch television after a day's work, rather than go out or engage in social activities? NO
 78. Does...prefer to listen and observe rather than take part in discussions? NO
 87. Is...interested in people and in making new friends? YES

-> LIMITED INTEREST IN SOCIAL CONTACTS AND INVOLVEMENT

2. Does...take an active part in community affairs or group activities? NO
13. Does...enjoy belonging to clubs or social groups? NO

T R A I T D, E X P R E S S I V E - R E S P O N S I V E /

 I N H I B I T E D

This trait measures the degree to which one is able to express cordiality, warmth and affection and to respond to such expression by others. ROBERT's Expressive portion of this scale is HIGH. His responsive portion of this scale is EXTREMELY HIGH.

ROBERT's Trait Score is at the 55th percentile. His sten score is 6. This is in the ACCEPTABLE zone of the profile. Please refer to the RESPONSE THEMES below for explicit patterns and tendencies.

EXPRESSIVE-RESPONSIVE/INHIBITED RESPONSE THEMES
 =====

-> READY EXPRESSION OF TENDERNESS AND AFFECTION

93. Is...thought of as a warm-hearted, out-going person? YES
112. Does...express appreciation and pleasure when looking at beautiful things? YES
128. Does...readily show tenderness to children? YES
143. Does...find it difficult to express sympathy to someone in sorrow? NO
148. Does...feel a bit uncomfortable when expected to express enthusiasm over a gift? NO
163. Does...feel free to discuss personal problems as well as joys with close friends? YES
174. Does...find it difficult to be complimentary to members of his or her family? NO

-> DIFFICULTY IN EXPRESSING TENDERNESS AND AFFECTION

91. Is...able to express affection without embarrassment? NO
98. Is...openly affectionate with members of the immediate family? NO
100. Does...find it difficult to express tender feelings in words? YES

-> RESPONSIVE, DEMONSTRATIVE, SECURE

105. Does...tend to be reserved in manner? NO
110. Does...find any discussion of sexual matters difficult or embarrassing? NO
121. Does...find it difficult to be friendly and responsive in contacts with people? NO
131. Is...apt to keep feelings 'bottled up inside'? NO
138. Does...speak with animation, enthusiasm, or frequent gestures? YES
141. Does...have many friends and acquaintances? YES
151. Is...a talkative person? YES
157. Does...feel self-conscious with most people? NO
170. Is...inclined to be shy and withdrawn? NO

-> RESERVED, RESTRAINED, INSECURE

178. Does...feel restrained and inhibited in a love relationship? YES

T R A I T E, S Y M P A T H E T I C / I N D I F F E R E N T

This trait measures such feeling capacity as compassion, perceptiveness, sensitivity to the needs of others and a sense of concern or social consciousness.

ROBERT scores at the 34th percentile. His sten score is 4. This is in the IMPROVEMENT DESIRABLE zone of the profile.

The Sympathetic scale has highest mean raw scores for the general population and the smallest standard deviations. Thus, the scores are 'bunched' toward the upper end of the scale. Because so many individuals in the standardization group responded to the items on this scale in a sympathetic fashion, it does not take many unsympathetic responses for the score to drop rapidly.

The RESPONSE THEMES below will delineate explicit configurations or tendencies.

SYMPATHETIC/INDIFFERENT RESPONSE THEMES

=====

A. RELATING TO PEOPLE

=====

-> EMPATHY, COMPASSION

- 1. Is...by nature a forgiving person? YES
- 21. Is...sensitive to the feelings and needs of any member of the family who is ill? YES
- 36. Is...quick to know when someone needs encouragement or a kind word? YES
- 51. Do many people consider...to be incapable of deep feeling? NO
- 53. Is...a sympathetic listener when someone needs to talk about himself or herself? YES
- 73. Is...quick to sense another person's feelings and moods? YES
- 86. Does...have little interest in other people's emotional problems? NO
- 88. Is...considerate and understanding when dealing with an elderly person? YES
- 90. Does...think it unnecessary to apologize after hurting someone's feelings? NO

-> DETACHMENT, INDIFFERENCE

- 4. Can...put himself or herself sympathetically in another person's place? MID
- 57. Is...the kind of person to whom others turn in time of distress or trouble? MID

B. RELATING TO SOCIETY
=====

-> SOCIAL CONSCIOUSNESS, CONCERN

49. Is...too soft-hearted to be a strict disciplinarian? YES
 60. Does...believe that everyone is entitled to a second chance? YES
 71. Would...take a special interest in helping young people who are frequently in trouble? YES
 84. Would...do everything possible to protect an animal from neglect or cruelty? YES

-> SOCIAL DISINTEREST OR INDIFFERENCE

12. Does...feel compassion for people who are weak and insecure? NO
 18. Is...seriously concerned about social problems, such as poverty and unemployment, even when not directly affected by them? NO
 46. Is...deeply concerned about the welfare of others? NO
 69. Is...easily moved to pity? NO
 81. Does...think our nation concerns itself too much with the needs and suffering of people in other countries? YES

T R A I T F, S U B J E C T I V E / O B J E C T I V E

This scale points out the presence of emotions which generally interfere with the ability to think clearly and objectively. It reflects the degree to which a person's thinking processes are influenced and distorted by inner feelings.

ROBERT scores at the 86th percentile. His sten score is 9. This is in the IMPROVEMENT NEEDED zone of the profile. There is the suggestion that a degree of emotional interference or distortion may preclude an open-minded logical perspective. Please refer to the RESPONSE THEMES below to analyze areas of concern.

SUBJECTIVE/OBJECTIVE RESPONSE THEMES
=====

-> ILLOGICAL THINKING

99. Does...sometimes become so emotional as to be unable to think or act logically? MID
 107. Do people sometimes accuse...of being illogical? YES
 109. Does...reach conclusions only after looking at all sides of a question? MID
 160. In voting, does...study personalities and issues, sometimes supporting a candidate of another party? NO

-> LOGICAL THINKING

144. Is...logical in thinking and speaking? YES
 150. Is...a fair-minded, reasonable person? YES
 154. Does...frequently misinterpret what others do and say? NO
 173. Does...avoid letting emotion influence sound judgement? YES
 179. If called upon, would...be fair and impartial in helping others to settle their differences? YES

-> EMOTIONAL INSECURITY

102. Does...tend to analyze and dwell on inner thoughts and feelings? YES
 119. Does...tend to be suspicious of people's motives and actions? YES
 134. Is...likely to be jealous? YES
 136. Does...find it hard to accept criticism or blame? YES
 140. Is...inclined to carry a grudge? YES
 165. Is...inclined to daydream about things that can't come true? MID

-> EMOTIONAL SECURITY

114. Does...sometimes get the uncomfortable feeling of being stared at or talked about? NO
 123. Is...easily embarrassed? NO
 162. Is...thought of as being overly sensitive? NO
 167. Does...find it difficult to get over an embarrassing situation? NO
 175. Is...especially self-conscious and concerned about what others might think? NO

T R A I T G, D O M I N A N T / S U B M I S S I V E

 This trait primarily measures EGO-STRENGTH from the standpoint of self-assurance and self-assertion. Included are a few questions dealing with the inclination to dominate and control.

ROBERT scores at the 95th percentile. His sten score is 10. This is in the ACCEPTABLE zone of the profile. The suggestion is strong ego-strength or self-confidence. However, people may complain that ROBERT is 'bossy' or over confident.

T R A I T G, D O M I N A N T / S U B M I S S I V E R E S P O N S E T H E M E S

=====
-> AGGRESSIVE, CONTROLLING TENDENCIES

23. Is...highly competitive in games, business, or personal relations? YES
 31. Is...so self-assured that at times it is annoying even to friends? MID
 59. Does...insist on prompt obedience? YES
 74. Is...very emphatic and forceful in voice and manner? YES

-> NON-ADVERSARIAL TENDENCIES

54. Is...always trying to convert someone to a particular point of view? NO

-> SELF CONFIDENCE, ASSERTIVENESS

5. Does...have a marked influence on the thinking of family or associates? YES
 8. Does...prefer to be a follower rather than a leader in group activities? NO
 10. Does...take the initiative in making arrangements for family outings and vacations? YES
 14. Does...seek to keep peace at any price? NO
 29. Does...like to be in charge of and supervise others? YES

34. Would...prefer to accept an unfair situation rather than complain? NO
39. Does...need encouragement and approval in order to work effectively? NO
41. Does...stand up for his or her rights? YES
43. Does...like to let people know where he or she stands on issues? YES
48. Is...self-confident in most undertakings? YES
50. Does...tend to rely on others when there are decisions to be made? NO
52. Does...find it easy to give way to wishes of others? NO
63. Is...easily taken advantage of by others? NO
85. Does...find it difficult to say 'no' to a persuasive salesperson? NO

-> ACQUIESCENT

67. Does...like to speak in public and enjoy the challenge of a debate? NO

T R A I T H, H O S T I L E / T O L E R A N T

This scale measures overt manifestations of anger, antagonism, or irritable, discourteous behavior which may have serious implications for interpersonal relations.

ROBERT scores at the 97th percentile. His sten score is 10. This is in the IMPROVEMENT NEEDED zone of the profile. Individuals who score in this range are often characterized by irritability and contentiousness. They are usually seen, to a greater or lesser degree, as arrogant, quick-tempered, prejudiced and prone to overt expression of such feelings. However, it is important to refer to the RESPONSE THEMES below for explicit proclivities.

-> THOUGHTLESS, TACTLESS BEHAVIOR

92. Is...apt to make thoughtless, unfeeling remarks? YES
117. Is...inclined to 'tell people off'? YES
129. Is...apt to be sarcastic when annoyed with someone? YES
158. Does...often make such blunt, cutting comments that someone's feelings are hurt? YES

-> QUICK-TEMPERED, OVERBEARING

111. Does...have a quick temper? YES
106. Does anyone ever complain that...is 'bossy' or unreasonable? YES
113. Is...inclined to be argumentative? YES
147. Does...frequently tend to dominate people around him or her? YES
161. Is...superior or overbearing in attitude toward others? YES

-> IMPATIENT, CRITICAL

145. Is...considered lenient and easy-going? NO
149. Is...quick to forgive a mistake and overlook a discourtesy? MID
156. Is...overly critical of some member of the family? MID

-> ACCEPTING

103. Is...understanding when someone is late for an appointment? YES
 108. When...offers a suggestion, is it apt to be more helpful than critical? YES
 125. Does...tend to be impatient with someone who is frequently ill? NO
 164. Is...slow to complain when inconvenienced or imposed upon? YES

-> INTOLERANT

96. Is...free from racial and religious prejudice? NO
 122. Does...have a deep respect for all human beings? NO
 132. Does...feel contempt for men who seem unable to make a living? YES

-> TOLERANT

172. Does...maintain that most people are 'out for all they can get'? NO

=====

DOMINANT/HOSTILE TRAIT PATTERN

=====

(G. DOMINANT 95th %ile, H. HOSTILE 97th %ile)

ROBERT falls in this pattern. A high Dominant score suggests confidence and the inclination to be assertive, which are considered positive characteristics. However, when an elevated Dominant score is accompanied by a high Hostile score, it suggests that the individual is confident enough to express his or her resentment and anger, which can have a destructive effect on social, marital and parent-child relationships.

T R A I T I, S E L F - D I S C I P L I N E D /

I M P U L S I V E

This trait explores three essential components of self-mastery: Organization, Control, and Perseverance. The respondent's Organized portion of this scale is EXTREMELY HIGH. The Controlled portion is HIGH. See the Response Themes (*) for information about Perseverance.

ROBERT's SELF-DISCIPLINED score stands at the 73rd percentile. His Sten score is 8.

This is in the EXCELLENT zone of the profile.

=====

SELF-DISCIPLINED/IMPULSIVE RESPONSE THEMES

=====

-> ORGANIZED, ORDERLY

30. Is...extremely neat and orderly? YES
 77. Does...make plans well in advance of the event and carry them out? YES
 83. Does...prepare a budget and make every effort to stay within it? YES

95. Does...have a place for everything and everything in its place? YES
133. Is...very methodical about keeping records of personal and
business affairs? YES
153. Does...work methodically and deliberately? YES

-> LAX OR NOT OVERLY CONCERNED WITH ORDER

20. Is...a well-organized person who likes to do everything
according to schedule? NO

-> CONTROLLED, CAREFUL

22. Does... act deliberately rather than impulsively? YES
61. Does...get into difficulty occasionally because of some
impulsive act? NO
66. Is...easily tempted by a bargain? NO
120. Is...apt to be too hasty in making decisions? NO
124. Is...inclined to stop and think before acting? YES
166. Does...often do things on the spur of the moment? NO

-> IMPETUOUS

11. Does...make many unrealistic plans for the future, which later
have to be abandoned? YES
79. Does...enjoy taking chances? YES
168. Does...find it hard to break a habit such as smoking or
overeating? YES

-> PERSEVERING (*)

58. Does...find it difficult to follow a definite plan? NO
115. Does...like to stick to one job until it is finished? YES
126. Is...always working toward some future goal? YES

-> CHANGEABLE (*)

177. Does... 's interest often shift from one thing to another? MID

* * *

SUPPLEMENTAL SCALES

The following SUPPLEMENTAL SCALES were developed for this report.
The score interpretation is as follows:

- Stens 8, 9, 10 are considered the HIGH RANGE.
Stens 6, 7 are considered the HIGHER AVERAGE RANGE.
Stens 4, 5 are considered the LOWER AVERAGE RANGE.
Stens 1, 2, 3 are considered the LOW RANGE.

SCALE 1, EMOTIONAL STABILITY

This scale deals with the accuracy with which the individual interprets the world and the extent of cognitive or cortical control over reactions to life's circumstances and events. The high scorer is generally, though perhaps not always, able to perceive accurately, reason clearly and react appropriately. The low scorer, on the other hand, suffers from distorted perception, faulty reasoning and inappropriate or over-reaction.

ROBERT's Sten score of 6 is in the upper average range of the scale.

SCALE 2, SELF-ESTEEM

This scale indicates how an individual feels about self in comparison with others. A high score may be said to represent a confident, unrestrained individual who has a realistic sense of self-worth and feels capable and accountable for personal conduct, performance and accomplishment. A low score, on the other hand, is usually evidence of a feeling of inadequacy and a sense of general insecurity. Often rejection which would be insignificant or unnoticed by others is taken as an indictment of his or her worth as a person.

ROBERT's Sten score of 10 is in the high range of the scale.

SCALE 3, OUTGOING/GREGARIOUS

This scale indicates the direction of the respondent's interest from primarily outward, deriving satisfaction by being involved with other people in real life situations to primarily inward, involving satisfaction from being by one's self and focusing on self and ideas. A high score suggests affability and sociability - a person who is friendly and easy to approach. Motivation results from external events. A low score suggests reserve, preoccupation with own thoughts and preference for solitary pursuits. Other people may feel that there is an aloofness toward them.

ROBERT's Sten score of 10 is in the high range of the scale.

SCALE 4, INTERPERSONAL EFFECTIVENESS

This scale measures characteristics conducive to forming and maintaining close family, parent-child and other interpersonal relationships. The high scorer is usually perceptive, considerate, patient, understanding and forgiving. There is a firm desire to get along with others and make allowance for their shortcomings. As scores fall into the lower stens, one can anticipate discomfort or even considerable difficulty in establishing and maintaining firm personal relationships. There is often a lack of patience and understanding with little inclination to be considerate of the weakness of others.

ROBERT's Sten score of 1 is in the low range of the scale.

SCALE 5, ALIENATING

This scale indicates the extent to which a person turns hostilities, frustrations, or insecurities into behavior that others are likely to view as disagreeable. A high scorer is likely to have poor impulse control, is usually quick to anger and inclined to be curt and to make objectionable statements. There is a pattern of thought and behavior which antagonizes others and provokes resentment and estrangement. The low scorer is slow to anger or holds his anger in check, refrains from making objectionable statements and is generally accepted and liked by others.

ROBERT's Sten score of 10 is in the high range of the scale.

SCALE 6, INDUSTRIOUS/PERSEVERING

This scale is an indication of initiative, tenacity of purpose and other qualities which go with self-assertion and leadership. High scorers on this scale tend to be cautious, prudent, organized, diligent and perseverant. They like to be in charge so that events will proceed along these lines. They are usually effective leaders and influence others without being perceived as excessively 'bossy'. Normally, all sides of an issue are considered then a stand is taken to support and defend what is believed to be relevant and appropriate.

A low score suggests that the respondent lacks many of the qualities which go with self-assertion, proficiency and productivity. Low scorers are rarely internally motivated and prefer and need to have someone to look up to, depend upon, and to direct them.

ROBERT's Sten score of 6 is in the upper average range of the scale.

SCALE 7, PERSUASIVE/INFLUENTIAL

This scale describes a 'people-centered', outgoing individual who is not only convivial, but energetic, forceful and convincing. The low scorer may lack self-confidence, or just not be interested in verbal exchange and talking people into a particular action or point of view.

ROBERT's Sten score of 10 is in the high range of the scale.

--> S U M M A R Y <--

ROBERT's Overall Adjustment sten score is 6. This is considered AVERAGE.

SUMMARY OF SCORES & PROFILE SHADED ZONES

	RAW SCORE	STEN	%ILE	SHADED ZONE
A NERVOUS	10	6	54	IMPROVEMENT DESIRABLE
B DEPRESSIVE	3	4	34	ACCEPTABLE
C ACTIVE SOCIAL	36	10	90	EXCELLENT
D EXP.-RESPONSIVE	32	6	55	ACCEPTABLE
E SYMPATHETIC	28	4	34	IMPROVEMENT DESIRABLE
F SUBJECTIVE	17	9	86	IMPROVEMENT NEEDED
G DOMINANT	35	10	95	ACCEPTABLE
H HOSTILE	28	10	97	IMPROVEMENT NEEDED
I SELF DISCIPLINED	31	8	73	EXCELLENT

DOMINANT: A very high Dominant score suggests an individual who is overly dominant or domineering and who is likely to arouse resentment and alienate others. In order to understand its implications, the dominant score should be considered in conjunction with the overall test results.
